Configuration Status Worksheet

CONFIGURATION STATUS	STATUS ICON	STATUS DEFINITION
Unconfigured		Requirements have not been set for tracking.
In Progress		Requirements are being set for tracking, but the user had to choose to "Save Progress" and has not finished the configuration.
Auto-Configured		Requirement tracking has been configured using the auto-configure option which automatically assigns requirement tracking based on administration settings.
Configured		Requirements have been configured.
Partially Configured		For auto-configuration, not all of the requirements were successfully set up. This commonly happens if a requirement requires a description. Required descriptions can not be generated during the auto-configure process.
Overridden		Users with permissions have selected "Override Configuration Status" to remove an "Unconfigured" Status.
