Version 2.7.53.1	2
Version 2.7.77.1	3
Version 5.7.18235.1	3
Version 5.7.21013.2	3

Version 2.7.23.1

Release Date: 5/5/2010

Latest Features

- Runs on 64-bit versions for Windows Server 2008 and Windows 7 with SQL Server 2008 and DMS v9.2 SP1
- Implemented <wsHttpBinding> web service binding instead of <basicHttpBinding> with certificates

Version 2.7.38.1

Release Date: 6/7/2010

Latest Features

- Ability to specify individual DMS document types in batch barcode process file
- Improved printer validation

Resolved Issues

- Requires new keyword and header selections when new DMS document type is selected in batch barcode process
- Requires workstation to have a printer installed
- Replaces application printer selections not available on current workstation with default workstation printer
- Removed Ctrl+V menu shortcut for Preview Queue
- Clear Values action clears current reused keyword selections

Version 2.7.44.1

Release Date: 2/11/2011

Latest Features

- Added support for OnBase v10.0.0.556 and higher
- Removed the percent sign (%) as an allowable 3of9 barcode character as it conflicts with OnBase v10 barcode recognition

Version 2.7.53.1

Release Date: 9/30/2011

Latest Features

- Works with OnBase read-only keywords
- Identifies required fields with light gold bgcolor
- Added version column in Help About dialog for client assemblies
- Tested with OnBase v10.0.1.613 SP1

Resolved Issues

- MSI deploys missing assemblies required to import and export users to the database
- Fixed problem caused by clicking clear in the keyword date calendar dropdown
- Replaces OnBase autofill keyword date values of 2000-00-00 with an empty string

Version 2.7.77.1

Release Date: 10/14/2014

Latest Features

- Both web service and client compatible with Windows Server 2012

System Requirements Changes

- Ensure that the INFO-INDEX web server application pool is set as follows:
 - .NET Framework Version v2.0
 - Enable 32-Bit Applications = True
 - Managed Pipeline = Classic
 - Identity = Network Service

Version 5.7.18235.1

Release Date: 8/23/2018

Latest Features

- Administration Setup is now available in the INFO-INDEX client vs being in separate applications:
 - Application Settings
 - Security Group Administration
 - User Administration
- Template definitions are stored in the database instead of an XML file
- Batch Process definitions are stored in the database instead of an XML file
- Database installer is available as a product feature of the server MSI

Resolved Issues

- Product registration updated from using the server machine ID to using the domain
- Support for Microsoft SQL Server 2016
- Support for Internet Information Services (IIS) 10 on Microsoft Windows Server 2016

Version 5.7.21013.2

Release Date: 1/14/2021

System Requirement Changes

- Support for Windows 2019 Server
- Support for OnBase EP3 version
- Removed requirement for Microsoft .NET Framework 2.0
- Removed requirement for Microsoft .NET Framework 3.5
